24 July 2026 at 06:22:19

I find this question hard to finalize: it overlaps with the next one, and also works differently for individuals and for organizations.

GENERAL PURPOSE

Reveal the people, activities, needs, and connections already present in the knowledge commons & AI ecosystem. Coordination begins with visibility.

QUESTIONS

(multiple choices allowed)

Part I - Who is speaking?

Q1

Context: Different roles see different parts of the same system. Coordination begins by making those perspectives visible.

1 | What is the main role that you would like to play?

Options:

- Community editor
- Decision-support interface
- Policy and advocacy
- Public institution
- AI developer
- Coordination support
- Observer / invited participant
- Artist, Creator
- Researcher
- Other
- If other or useful, specify "Your role in a few words"

Q2

Context: Your expertise helps build, interpret, translate, and apply strategic projections.

What areas of expertise do you bring?

- Technical development
- Policy and advocacy work
- Governance (licensing, protocols, etc.)
- Stakeholder engagement
- Infrastructure
-
- Coordination and facilitation
- Community management
- Other: what?
-

Q2b

2. Alek Tarkowski

24 July 2026 at 06:23:06

I would keep this open / let people write up to three things.

For each of the chosen areas, please describe in more detail what are the specific capacities that you bring. What specific projects are you doing that could be part of the shared mission?

Q3

Context: This helps identify where coordination can reduce friction and unlock collaboration.

What are your needs? What would you expect to get out of the consortium?

2

- Tools showcasing
- Accessing data
- Comparing models
- Technical infrastructure
- Stakeholder connection
- Finding collaborators
- Communication
- Funding
- Visibility
- Other

[Add question on the site](#)

Which is the size of your organisation/structure/actor?

Small (less of ten people)

Medium (10-100)

Big (More than 100)

Part II. Spatial context

Q4

Context: Knowing where people are primarily based helps coordinate meetings, understand regional contexts, and reveal the geographical distribution of the network.

Where are you based? -> ask before

Country, region, or main base

Institution

City

Q5

Context: Mapping regional focus reveals coverage, overlaps, gaps, and opportunities for collaboration.

What is the geographic scope of your work

- Central and Eastern Europe (CEE)
- East, Southeast Asia & the Pacific (ESEAP)
- Europe
- Latin America & the Caribbean
- Middle East & North Africa (MENA)
- North America

3. Alek Tarkowski

24 July 2026 at 06:24:16

Similar to Q2?

4. Alek Tarkowski

24 July 2026 at 06:25:05

Maybe: does your organization have a strategy related to knowledge commons and AI? if yes, please share it.

5. Alek Tarkowski

24 July 2026 at 06:25:27

I propose to move this earlier

6. Alek Tarkowski

24 July 2026 at 06:26:04

suggest removing - I would find this hard to answer

- South Asia
- Sub-Saharan Africa
- Global / cross-regional work
- Other

7. Marta Severo

24 July 2026 at 11:53:46

I agree

Specify region, country or linguistic area if useful

Part III. Needs

Q6

3 | Context: Select the domains of action where most of your work, expertise, or decision context is focused.

Which domains is most relevant to your work? -> closer to the question of expertise (fusion with Q2)

- Data governance
- Protocol governance
- Technical experimentation
- Licencing
- Community mobilisation
- Education
- ...
- Other (specify)

Q7

Context: Identifying different strategic lines of action to enable convergence.

4 | **What are your main objective regarding the stewardship of knowledge commons & AI?**

- options...

5 |

Q8

Context: Understanding resource and support gaps to help match needs with existing capacities across the movement.

What are you working on right now?

(open field) funding, technical expertise, infrastructure, partner introductions, access to specific tools...

6 | 7

Q9

Context: Different questions unfold over different timescales. This helps align short-term coordination with long-term change.

What time scale are you working with?

- Immediate (next week)
- Monthly
- 3 months

8. Alek Tarkowski

24 July 2026 at 06:26:29

I would not open the question of priorities right now.

- Seasonal
- Annual
- 3 years
- Not sure
- Other

Add detail (optional) :

Q10

Context: Contributions take many forms: expertise, data, methods, questions, connections, initiatives, or coordination.

What could you contribute to this collective effort at this stage?

(Open field) One contribution, capacity, connection, method, or question

8

Q11

Context: What would strengthen this network as a whole?

What do we need to coordinate?

Order by priority

- Clearer use cases (give on example by choice, explain the option)
- Data access
- Sharing tools
- Model comparison
- Policy interface
- Stakeholder mapping
- Workplan clarity
- Visibility of expertise
- Map existing initiatives
- Other

Add one detail (optional) : "What would make this immediately useful?"

Q12

Context: We propose to call this networking effort Mosaic: Mission for Open Stewardship of AI and the Commons.

How strongly does this name resonate with your view?

-5 = dissonates · 0 = neutral · 5 = strongly resonates

Do you have any remarks or suggestions on this name?

Q13

Context: So we can follow up with you on next steps or share outcomes from this mapping exercise.

Your name (or username) and email,
Q14

Do you have any remarks or suggestions on the survey? Missing questions, unclear phrasing, ...
